CORPORATE CAPABILITIES—INFORMATION TECHNOLOGY

Leading Solutions LLC is a SBA-certified Service-Disabled Veteran-Owned Small Business (SDVOSB) and Woman-Owned Small Business (WOSB) specializing in delivering innovative Information Technology (IT) services and support to federal, defense, and commercial clients. With proven experience supporting the all DoD Services, TSA, FEMA, NOAA, USDA, and other federal agencies, we provide comprehensive IT solutions including systems administration, network administration, LAN/WAN management, server operations, and modeling and simulation. Our ISO 9001:2015 certified Quality Management System and Top-Secret Facility Clearance ensure that every engagement meets the highest standards of performance, security, and customer satisfaction. Operating across multiple states with a highly skilled, distributed workforce, Leading Solutions is trusted to deliver mission-critical IT services that enhance operational efficiency and reliability.

CORPORATE DISTINCTION

Leading Solutions delivers value to government and commercial customers through service excellence, price competitiveness, and committed management. We consistently meet requirements by leveraging a highly professional workforce and exceptionally responsive recruiting capabilities to fill even the most specialized positions. Our competitive pricing strategies align with customer budgets while ensuring strong recruiting and retention for stable performance. Backed by engaged leadership and experienced managers, we provide responsive, compliant, and high-quality services that drive mission success.

PAST PERFORMANCE EXAMPLES

- **Mission Training Complex Capabilities Support II (MTCCS II):** Leading Solutions provides comprehensive IT systems and simulation support to U.S. Army Mission Training Complexes. Our team delivers expertise in network administration, database management, systems engineering, and simulation operations to ensure realistic, integrated training environments that enhance unit readiness. By managing networks, maintaining mission-critical systems, and operating advanced simulation tools, we provide Mission Command training, technical expertise, exercise, and simulation support from individuals and small units through large-scale distributed training and exercises.
- **TRADOC G-2 Operational Environment (OE) and Core Functions:** Leading Solutions delivers critical IT and systems administration support to sustain secure, reliable, and mission-ready networks, applications, and databases for the Operational Environment. Our team manages system security, virtualization, and simulation software integration while providing IT asset management and lifecycle support across multiple locations. These services ensure TRADOC has the resilient IT infrastructure needed to develop and deliver realistic training environments for Army leaders and units.
- **Research Computing Linux Administrator Support Services:** Leading Solutions supports the Naval Postgraduate School by managing and maintaining Linux-based workstations, servers, and High Performance Computing (HPC) systems used in research, teaching, and advanced computational projects. Our team provides system installation, upgrades, security hardening, and user support while administering HPC clusters, GPU servers, and cloud workloads on AWS. These services ensure that students, faculty, and researchers have reliable, secure, and high-performing IT environments to advance mission-critical education and research.
- **GSA MAS SIN 54151S:** Leading Solutions has the ability to provide a full range of IT professional services, including systems design, network and systems administration, cybersecurity, database management, and cloud solutions. We are positioned to support federal missions with secure, reliable, and scalable IT capabilities, from enterprise infrastructure management to advanced simulation and training environments.
- **OASIS+ SB, WOSB and SDVOSB:** Leading Solutions is strategically positioned to deliver IT-enabled Technical, Engineering, and Intelligence services across the federal landscape. Our ability to integrate systems engineering, secure IT infrastructure, and advanced data and intelligence solutions ensures we can directly support complex defense, national security, and civilian missions. This positioning not only expands our competitive reach but also strengthens our role as a trusted partner for agencies seeking innovative, agile, and compliant IT solutions under OASIS+.
